

**SFS intec adjustable invisible hinge:
New Cir for flush fit doors.**

Aesthetic, easy to fit and adjust.

The new SFS intec invisible hinge, has been designed to be cost effective and easy to install on both left and right handed doors.

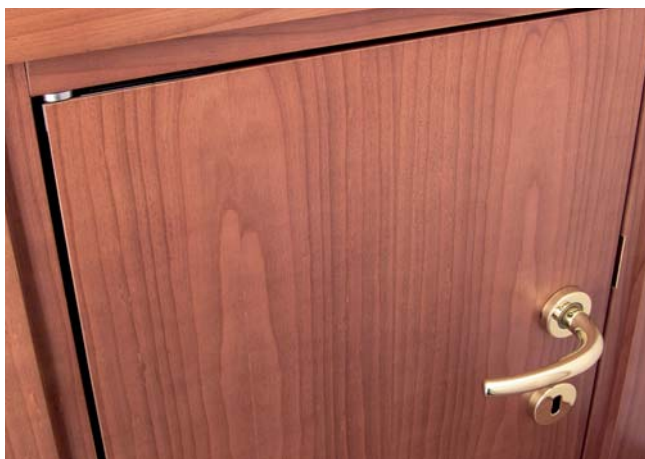

The adjustment can be done on an assembled door with a standard Allen key.

The design allows for horizontal adjustment of up to +/- 3 mm along with gasket pressure adjustment of +/- 1,5 mm.

The fulcrum of rotation is constituted by a pin in self lubricating material which guarantees both smooth and long term operation.

SFS intec has created a complete system for this product which is composed of the hinge, the cover caps which are available in different colours and the installation jig.

Technically reliable, the new invisible hinge has been tested with a door weighing 70kg at 200.000 open/close cycles.

Order code	Finish	Packaging
Hinge		
757.741	Zinc	6 pairs
Cover caps		
768.006	Ivory	60 pce
768.007	Brown	60 pce
771.111	Black	60 pce
