

**SFS intec adjustable stainless steel hinges:
durability and beauty guaranteed**

SFS intec adjustable hinges have been developed to reach the maximum grade of quality, from a technical, functional and aesthetical approach.

The adjustable hinges are supplied to the European market and have been in use for over ten years. The hinges have been tested extensively and are fully certified. To meet the ever increasing demands of our customers, the range of the adjustable hinges has been extended to include a stainless steel version.

Whilst suitable for many applications, such as prestigious doors, the range has been designed especially for installations where corrosion resistance is a major consideration such as in hospitals and food preparation areas.

The hinges are available in both 15mm and 20 mm diameters with matt or bright finish. The hinges have the same physical dimensions as the standard product and have been subjected to the same rigorous testing of 200 000 cycles.

Adjustable hinges 11R

∅	Code	Finish	Packaging
15	750302	Bright inox	10 pieces
15	750303	Matt inox	10 pieces
20	756885	Matt inox	10 pieces
